

RECOVERIES OF MARKED PINK SHRIMP, Penaeus duorarum BURKENROAD, RELEASED ON THE FLORIDA TORTUGAS GROUNDS IN 1965

By

Charles E. Knight^{1/} and Richard J. Berry, Fishery Biologists
Bureau of Commercial Fisheries, Galveston, Texas 77550

ABSTRACT

In the course of two studies on the Tortugas fishing grounds in 1965, Bureau of Commercial Fisheries personnel stain marked and released 18,804 pink shrimp. Of these, 7,106 were recaptured by the commercial fishing fleet. This report contains information on dates and locations of release and recaptures of shrimp, identification of vessels that caught marked shrimp, and data on sex, length, and weight of the shrimp recovered.

INTRODUCTION

The pink shrimp, Penaeus duorarum Burkenroad, that support commercial fishing on the Tortugas grounds near Key West, Fla., have been studied several times in recent years. A number of mark-recapture studies have been designed to determine movements or rates of growth and mortality of shrimp (Costello and Allen, 1960; Iversen and Jones, 1961; and Kutkuhn, 1966). Such large quantities of data result from these studies that it is usually not feasible to include all of them in published reports. The information given here pertains to mark-recapture experiments by Bureau of Commercial Fisheries personnel on the Tortugas grounds during 1965 and is intended to serve as a source of reference for future reports. Comparable data from previous studies of pink shrimp were made available by Allen and Costello (1966).

DESCRIPTION OF EXPERIMENTS

Marked pink shrimp were released on the Tortugas grounds during two studies in 1965. The first, begun in late January, included releases of eight groups of distinctively marked shrimp, totaling 11,605 individuals. Of these, 6,055 were later recaptured by the commercial

P. O. Box 60267, New Orleans, La. 70160.

fishing fleet and returned to the investigators. The second study, begun in October, involved the release of 7,199 marked shrimp divided among three groups. A total of 1,051 shrimp were recovered from the fall study.

The procedures used in the capture and marking of shrimp were similar to those described by Costello (1964). Specimens to be marked were caught by otter trawls near the areas where the shrimp were subsequently released. The shrimp were marked by injections of a biological stain (fast green FCF or Niagara sky blue) into an abdominal segment. Within a few hours the shrimp's circulatory system transports the stain to the gill area where it remains. A secondary marking material, composed of a fluorescent pigment mixed with petroleum jelly (Klima, 1965) was injected into some of the shrimp as a means for distinguishing groups. This type of secondary mark remains at the injection site, thereby making it possible to differentiate marks by virtue of either their location or their color. Marked shrimp were held in tanks on the research vessel about 24 hours after marking, and only those individuals that appeared to be in excellent condition were released. A messenger-activated container, similar to that described by Costello (1964), was used to lower marked shrimp from the vessel to the sea floor.

A grid, which divided the fishing area into squares measuring 5 nautical miles on each side, was imposed on a map of the Tortugas grounds to provide a means for locating positions (fig. 1). All information on releases and recaptures was coded in accordance with this grid system.

Most of the recaptured marked shrimp were found by fishermen when they were sorting their catches at sea; however, sometimes marked shrimp were found by employees of processing plants after the catch had been unloaded from a vessel. All persons who returned marked specimens to the investigators were interviewed to determine the location and circumstances under which the shrimp had been found.

EXPLANATION OF TABULAR DATA

Table 1 has information pertaining to the groups of shrimp released in the spring and fall studies. The spring study was designed to provide information of three types; therefore it was necessary to release several groups of shrimp that could be distinguished from each other. Experiments 1, 2, and 3 were intended to provide replicate information

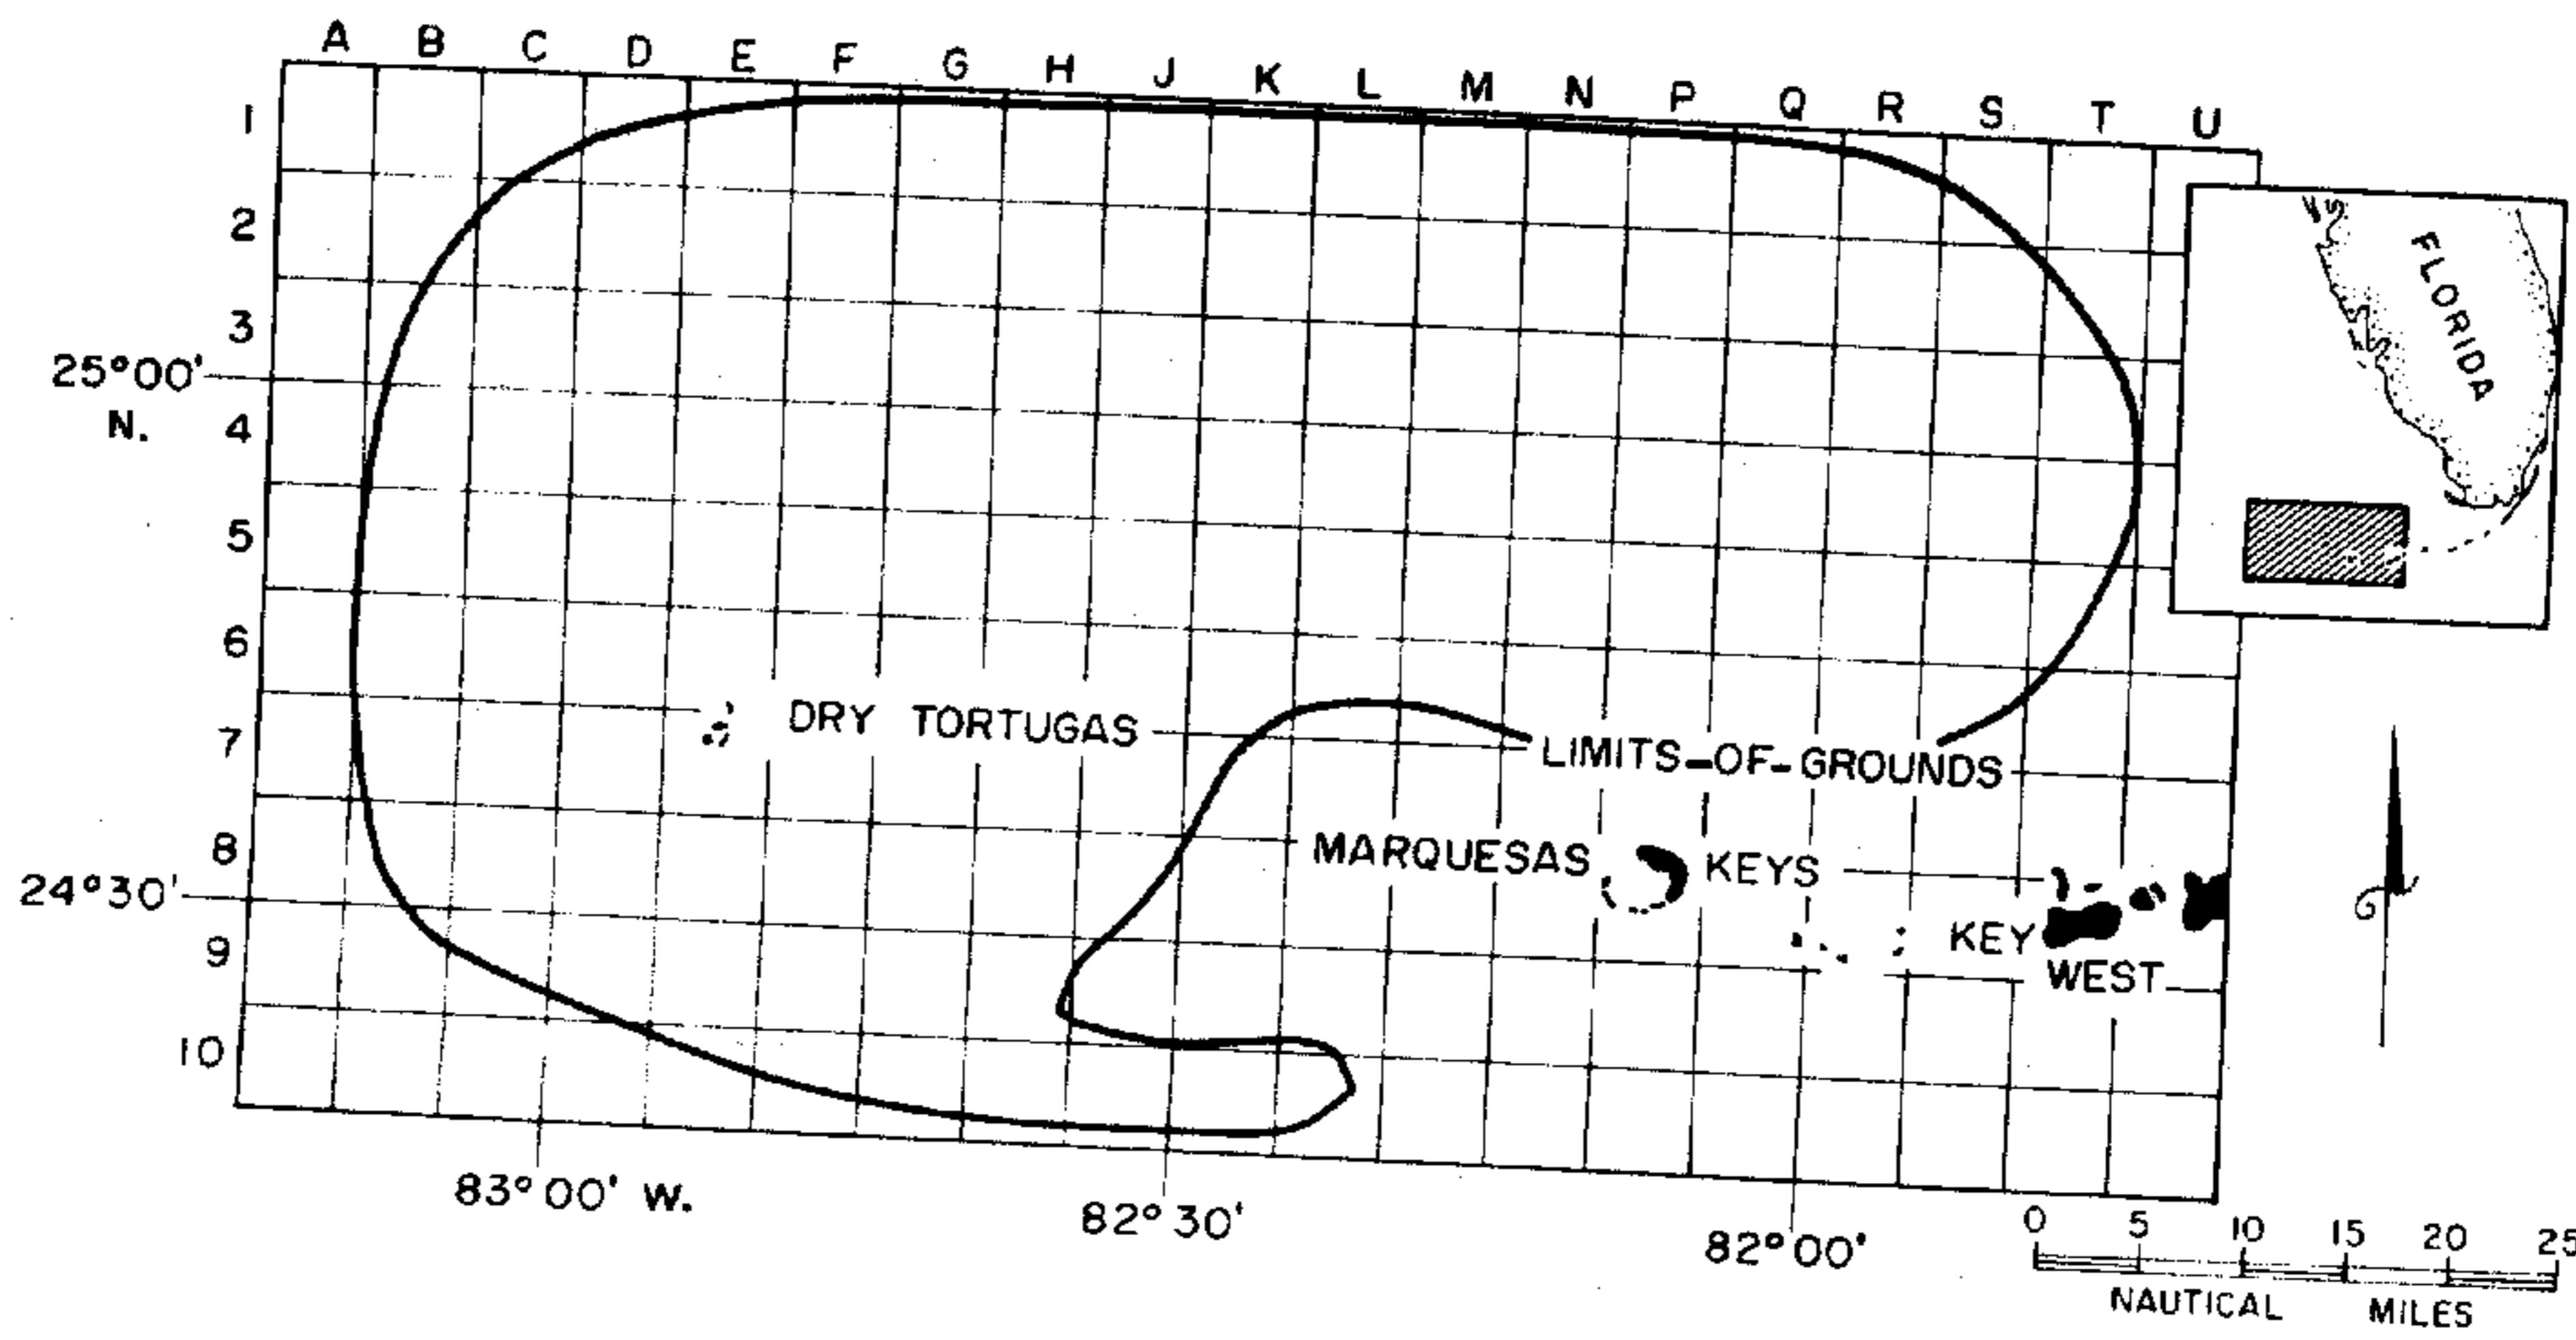

Figure 1.--Grid system used to locate positions at which marked shrimp were released or recovered.

concerning mortality. Additional groups of shrimp, selected on the basis of their size (95-104 mm.), were liberated to provide growth data. Within each experiment, a further division was made whereby about 2,500 marked individuals were liberated randomly throughout a release square and about 500 were released at the center of the square to provide data on movement.

The fall study, designed to provide growth data only, included the release of three groups of shrimp of restricted size ranges.

Recovery data for individual marked shrimp are listed in table 2. An explanation of abbreviations used in this table is provided below:

NO. -- A number was assigned to each shrimp recovered to facilitate reference to particular individuals.

DAYS -- The number of days that a marked shrimp was at large. This number was calculated from the median release date.

TL -- Total length in millimeters of a shrimp at the time of recapture. Measurements were made from the anterior tip of the rostrum to the posterior tip of the telson.

TW -- Total weight in grams of a shrimp at the time of recapture.

SEX -- Male (M) or female (F).

AREA -- Location at which a shrimp was recaptured, corresponding to the grid in figure 1.

VESSEL -- The official registration number of the vessel involved in recapture of a shrimp.

LOC. -- The location at which a marked shrimp was found, either on a fishing boat (B) or in a processing house (H).

--- -- Data not available.

Table 1.--Description of groups of marked pink shrimp released on the Tortugas grounds in 1965

| Study purpose and group | Total lengths (range) | Dates of release | Area of release | Primary mark | | Shrimp released | Shrimp recovered | | | | | |
|---------------------------|-----------------------|-------------------|-----------------------------|--------------|-----------------------------|-----------------|------------------|--|--|--|--|--|
| | | | | Mm. | Number | | | | | | | |
| <u>Spring - Mortality</u> | | | | | | | | | | | | |
